The black swan feeds in a similar manner to other swans. When feeding in shallow water it will dip its head and neck under the water and it is able to keep its head flat against the bottom while keeping its body horizontal. In deeper water the swan up-ends to reach lower. Black swans are also able to filter feed at the water's surface.

Karl Popper thinks that scientific theories can not be justified, even on the basis of a very large number of empirical observations, they can only be evaluated from tests whose logic consists in trying to test the scientific knowledge

Black Swan 2010 IMDb

Black Swan is sensual, seductive, lustful, and intense, and Aronofsky's direction captures it all perfectly. With a style as complex and masterful as Aronofsky's, it is hard for any aspect of the film to look bad, but this wasn't a problem because I felt that every aspect of this film was nearly flawless.
